Why PAC Elite Basketball

Coaching

At PAC Elite Basketball, our coaches make the difference. We have the most passionate, knowledgeable and hardworking coaching staff in the area. Our coaches are fully committed to your athletes' basketball development.

Player To Coach Ratio

We have the most favorable player to coach ratio in the area. This gives your athlete a more focused, attentive skill development experience.

Our Circuit Team coaches are dedicated to one team per session. This allows them to focus primarily on 8-10 rostered players which results in maximized player and team development.

College Recruitment & Exposure

Over 70% of our high school players move on to play college basketball. We have established and maintain relationships with various University and Junior College programs. Our coaches and program director will work directly with you and your athlete to assist in navigating through the complex college recruitment process.

Value

No other AAU program in Lake, McHenry, Cook or Kenosha Counties comes close to providing the overall value. Each session, we offer more training hours, more tournaments and more games at a more competitive price point than competing programs. This directly results in greater skill development for your athlete.

NY2LA Association - Official Member

NY2LA is renowned as one of the premier Independent Basketball platforms in the Country for nearly two decades. PAC Elite is one of just a few programs in the area and the only program in Lake County Illinois that is an official member.

Great Regional Talent

Our program recruits heavily in the Lake and McHenry County area. This provides the exciting opportunity for players to compete and train alongside players from their Conference or surrounding Conferences.
