Trimester 1	Trimester 2	Trimester 3
Earth's Systems	Structure and Properties of Matter	Ecosystems: Interactions, Energy, and Dynamics
2-ESS2-2 Student can develop a model to represent lands and bodies of water.	2-PS1-1 Student can investigate and categorize materials by their properties.	2-LS2-1 Student can investigate plants and determine if they need sunlight and water to grow.
2-ESS2-3 Student can identify where water is found on Earth and explain that it can be a solid or liquid.	2-PS1-2 Student can analyze data from testing different materials to identify their properties.	2-LS2-2 Student can develop a model that showcases the way animals help disperse seeds or pollinate plants.
	2-PS1-3 Student can explain how an object can be disassembled and then made into a new object.	2-LS4-1 Student can observe plants and animals then compare and contrast them.
	2-PS1-4 Student can construct an argument with evidence that some changes caused by heating or cooling can be reversed and some cannot.	Engineering Design
	Engineering Design	K-2-ETS1-1 Student can ask questions, make observations and gather information about a problem.
	K-2-ETS1-2 Student can sketch, draw or model an object that shows how its shape helps solve a problem.	K-2-ETS1-2 Student can sketch, draw or model an object that shows how its shape helps solve a problem.
	K-2-ETS1-3 Student can analyze data from two objects and find the strengths and weaknesses each one has in order to solve a problem.
